Small farms and food plots …
just right for the Land Pride disc.

Land Pride Disc Harrows break up the ground with their heavy-duty frames and heat treated disc blades, making them ideal for landscapers and small acreage farmers.

Our 10 & 15 Series Disc Harrow offers smooth disc blades for light tilling or choose the notched disc blades for more aggressive digging and cutting action. Cutting aggressiveness can be obtained by angling the disc gangs, and can be adjusted on the front and rear with the help of an adjustment handle. The 1/2" frame sideplates offer additional strength and reinforcement to the 3" x 2" gang tube. The 25 Series offers the heavier duty harrow with 20" or 22" notched blades. Just right for the smaller acreage areas, the 25 Series fits a variety of users. From produce farms to conservation plots and even roadside work, this harrow is built to give excellent results.
